Field trial and success stories

Most of the partners reported business-academia events additional to the planned in project proposal which strengthen the project impact

BME: three business-academia training events in Hungary.

UNED and INOMA reported big training events on green energy for the business in Spain.

INES provided national training seminar on renewable energies to 48 PhD students from France.

UPB-CETTI have signed agreement with a number of Romanian enterprises for the use of MECA courses and training to be provided to the industrial partners.

TU-Berlin: high appreciation by students of the courses on entrepreneurship, communication, project management and on technical courses as well.

Polito and TUS students and PhD students are working on projects provided by the company AMG Technology.

On the project Web site a new page with the project achievements is created and all reported activities and success stories are published.
